EDUCATION

B.Tech in Computer Science — Charotar University of Science & Technology (CHARUSAT)

2025 – 2028

CGPA: 7.00 | Expected Graduation: 2028

Diploma in Computer Engineering — Parul University, Vadodara, India

2023 – 2025

CGPA: 8.20

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

SKILLS

Languages: C++, Python, JavaScript, TypeScript

Frameworks & Tools: React, Node.js, Express.js, Flask, MongoDB, MySQL, Git, PyTorch, OpenCV, MediaPipe

PROJECTS

Creator Flow – Jan 2024

AI-powered content platform that streamlines the content creation pipeline for creators. Auto-generates scripts, thumbnails concepts, and scheduling strategies.

Civic Issue Reporting System – Jan 2024

Trained a two-stage deep learning pipeline (UNet for pixel-level segmentation, ResNet18 for severity classification) on 7,419 annotated images to detect and grade civic issues like potholes and damaged streetlights, with sub-2s CPU inference.

Built a dual-portal Flask system (citizen + government) with a REST prediction API that auto-fills category, severity, and GPS location, cutting average report filing time from minutes to seconds.

Technologies: Python, PyTorch, Flask, OpenCV, UNet, ResNet

Smart City Dashboard – Dec 2025

Real-time urban data analytics dashboard tracking traffic, pollution, energy, and citizen reports. Built for city municipalities to make data-driven decisions.

ACHIEVEMENTS

- Runner-Up, Kavach Hackathon — built a technical solution for a cybersecurity and public-safety problem statement
